## PERSONAL PROJECTS

### Discord Notification Bot (07/2018 - Present)
- Used IFTTTs module to scan new uploads from selected YouTube channels
- Used REST API to push those notifications to a webhook within Discord
- The Discord bot continues to push notifications of new videos to this day

### Webscraping (06/2018 - 07/2018)
- Used Selenium and Requests for scraping www.livemint.com
- Used Beautifulsoup and Requests for scraping www.coindesk.com
- Did this on behest of a freelancer for their Machine Learning work

### Mock Store HomePages using HTML and CSS (08/2019 - 08/2019)
- Helped two acquaintances in designing mock store homepages

### Personal Website (10/2018 - 10/2018)
- Built using GitHub Pages using a customized Ruby template
- Hosted on GitHub itself

### Top Down shooter in Unity using Open source assets (06/2020 - 02/2021)
- Part of a Group Project
- Added Movement, Rotating turrets, Camera Controls, Bullet physics for the player
